

AARAV SHARMA

Vellore, Tamil Nadu, India | +91-98765-43210 | aarav.sharma@example.com | LinkedIn | GitHub | Portfolio | LeetCode

SUMMARY

Computer Science undergraduate with hands-on experience building backend services and applied machine learning systems. Comfortable across Python, Java and TypeScript.

EDUCATION

Vellore Institute of Technology, Vellore — B.Tech, Computer Science and Engineering, 2022 – 2026, CGPA: 8.72/10

Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, Machine Learning, Computer Networks

EXPERIENCE

Software Engineering Intern, Zoho Corporation, Chennai — May 2025 – Jul 2025

- Built REST APIs in Java with Spring Boot to expose internal ticketing data to three downstream teams.
- Wrote PostgreSQL queries and added indexes that reduced a nightly report job from 40 minutes to 9 minutes.
- Added JUnit and Mockito tests covering the ticket assignment service.
- Containerised the service with Docker and documented deployment steps for the platform team.

Research Assistant, VIT AI & Robotics Lab, Vellore — Aug 2024 – Apr 2025

- Implemented a PyTorch training loop for a transformer-based text classifier on a 60k-sample dataset.
- Ran ablation experiments and logged results with Weights & Biases for the lab's NLP paper submission.
- Preprocessed raw corpora using pandas and NumPy, building a reusable tokenisation pipeline.

INTERNSHIPS

Frontend Developer Intern, Kalvium, Remote — Dec 2023 – Feb 2024

- Built responsive React components with TypeScript and Tailwind CSS for the student dashboard.
- Integrated REST endpoints using Axios and added client-side form validation.

PROJECTS

SemanticSearch | Python, PyTorch, FAISS, FastAPI | Repo | Live

- Built a semantic document search engine using sentence-transformer embeddings indexed in FAISS.
- Exposed a FastAPI service with a /search endpoint returning ranked passages.
- Added a retrieval-augmented generation mode that grounds answers in retrieved passages.

DevTrack | Node.js, Express, MongoDB, React | Repo

- Developed a full-stack issue tracker with JWT authentication and role-based access control.
- Designed MongoDB schemas with Mongoose and wrote aggregation pipelines for the analytics view.
- Deployed the service on Render with a GitHub Actions CI workflow running tests on every push.

LeafScan | TensorFlow, Keras, Flask | Repo

- Trained a convolutional neural network in TensorFlow to classify plant leaf disease across 12 classes.
- Served predictions through a Flask API consumed by a lightweight web client.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C++

Frameworks: Spring Boot, FastAPI, Flask, React, Node.js, Express, Next.js

Libraries: PyTorch, TensorFlow, Keras, scikit-learn, pandas, NumPy, Mongoose

Tools: Git, Docker, Postman, GitHub Actions, Weights & Biases, Linux, Jira

Technologies: REST APIs, PostgreSQL, MongoDB, Redis, FAISS, JWT, CI/CD

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services, 2025
- Deep Learning Specialization — DeepLearning.AI, 2024

ACHIEVEMENTS

- Finalist, Smart India Hackathon 2024 among 200+ participating teams.
- Solved 450+ problems on LeetCode; contest rating 1783.
- Runner-up, VIT Intra-College Hackathon 2023.
